*You've heard about it....*

*Now come and see it in action...*

Autodesk REVIT is a building information modelling (BIM) system that is revolutionising the way Architects use CAD, practise design and make changes... ultimately affecting your bottom line.

surfaces, studying the effects of lighting on your design, exploring design alternatives with walk-through animations, or producing an entire sheet set, AutoCAD 2007 software has the tools to make it happen quickly and accurately.

CADPLAN Architectural is a complete ARCHITECTURAL solution for AutoCAD users. Cadplan does away with the drudgery frequently associated with certain architectural tasks by providing features that allow the AutoCAD user to focus on the design process, and not on CAD techniques. Cadplan's intuitive commands minimize the number of steps it takes to finish a particular task. There are over 150 powerful commands to accelerate your productivity inside AutoCAD.
